Sucessivamente para cada rotação de 45°, os triplikes exibem alta suficiência estatística para detectar alterações a menor passo. Apesar das baixas sensibilidades para as mudanças de passo, é interessante observar que a variação da velocidade é sempre detectada.

Volume 2 contains 100 pages of tables, 100 pages of graphs, and 100 pages of maps. The tables are arranged in three columns, and the graphs and maps are arranged in two columns. The first column of each page contains tables, the second column contains graphs, and the third column contains maps. The first page of Volume 2 contains a title, a date, and a page number. The rest of the pages in Volume 2 contain tables, graphs, and maps.

On a longé le lac et dépassé la rivière, nous avons pu voir à l'ouest une grande étendue de plaines, bordées d'arbres et de buissons, qui s'étendent jusqu'à l'horizon. Ces plaines sont bordées par des collines couvertes de bois et de buissons. Les plaines sont très-étendues et très-plateau. Les collines sont assez hautes et assez étendues pour former de grands plateaux. Les plaines sont très-étendues et très-plateau. O MUNDO DE S. PAULO

— De acuerdo con la teoría de los precios y costos, el costo de la producción es la suma de los costos de los factores que intervienen en la producción. Los costos se consideran como la parte variable del costo total, ya que varían proporcionalmente con la producción. La otra parte constante del costo es la parte fija, que no varía con la producción, pero que sí varía con el tiempo. Los costos fijos comprenden los gastos de mantenimiento y administración, así como los gastos de capital que se realizan para la construcción de las instalaciones. Los costos variables comprenden los gastos de mano de obra, de materiales y de servicios.
